Full stack developer with a focus on Javascript technologies. Prior to becoming a developer, I worked in application support managing a team of 12 analysts and working closely with developers and QA. I hope to create products that will change the world.

## Software Development Skills

- Debugging, JavaScript, Python, Node.js, React, Express, Redux, RESTful API, PostgreSQL, Bootstrap, AWS, React Native, HTML, CSS, Git, Jira

## Education

Sheridan College | Computer Systems Analysis | Oakville, Ontario

2014 – 2016

DigitalCrafts | Certificate in Software Engineering | Atlanta, GA

2019

- Software engineering training program covering full-stack development including, but not limited to JavaScript, Python, including an emphasis on cutting-edge frameworks like React/Redux and server-side technologies including Node.js, Express, and PostgreSQL.

## Software Development Portfolio

**MyVitaLog** | [myvitalog.com](http://myvitalog.com) | [github.com/cm Kemp52/myvitalog](https://github.com/cm Kemp52/myvitalog)

2019

- Daily diet tracker that uses USDA's APIs to pull nutrition information. Provides user with information about nutrition and offers users suggestions based on their daily logging.
- Created with a 3-person development team in 3 days. Primarily responsible for creating the back end.
- Full stack project built with Node.js, Express, and PostgreSQL

**BusTalker** | [bustalker.com](http://bustalker.com) | [github.com/cm Kemp52/bustalker](https://github.com/cm Kemp52/bustalker)

2019

- Commuter assistant that uses MARTA's APIs. Displays a live map with bus locations and details on how each bus is adhering to schedule. Also provides other helper functions such as live train updates and MARTA's tweets.
- Created with a 3-person team over a week of development. Primarily responsible for elements using MARTA's bus API, such as the map and chart displays.
- Fully front end project that makes use of various public APIs. Styled using Bootstrap.

**Abraham Lincoln: President But Also Slayer of Goblins** | [github.com/cm Kemp52/roguelike-rpg-pygame](https://github.com/cm Kemp52/roguelike-rpg-pygame)

2019

- Very early programming project in which I lead a 3-person team over 4 days of development
- Primarily responsible for creating most of the game's logic systems and designing the first level.
- Built with Python using the Pygame library

## Professional Work Experience

Piksel | Lead Live Support Analyst | Atlanta, GA

2016 – 2019

- Managed a team of 12 analysts handling applications support for live streaming video products.
- Worked closely with QA and developers to test products and handle Jira tickets.
- Handled hiring and training process for my team, bringing training time down from 2 months to 2 weeks.
- Created documentation for all of my team's workflows, greatly increasing team's efficiency and uniformity.

Namco Pools | Salesperson | Westminster, MD

2011 – 2014

- Served customers by guiding them through the purchasing process and providing them with insights on our products
- Filled and submitted order forms and created weekly reports for management.
- Was recognized by management as one of the top sales people in the company.

## Certifications

ITIL Foundation

2018
